

Open Research policy briefing

Melbourne Scholarly Summit – 19th February 2020

Matt Cannon – Head of Open Research

Matthew.Cannon@tandf.co.uk

@mattcannontf

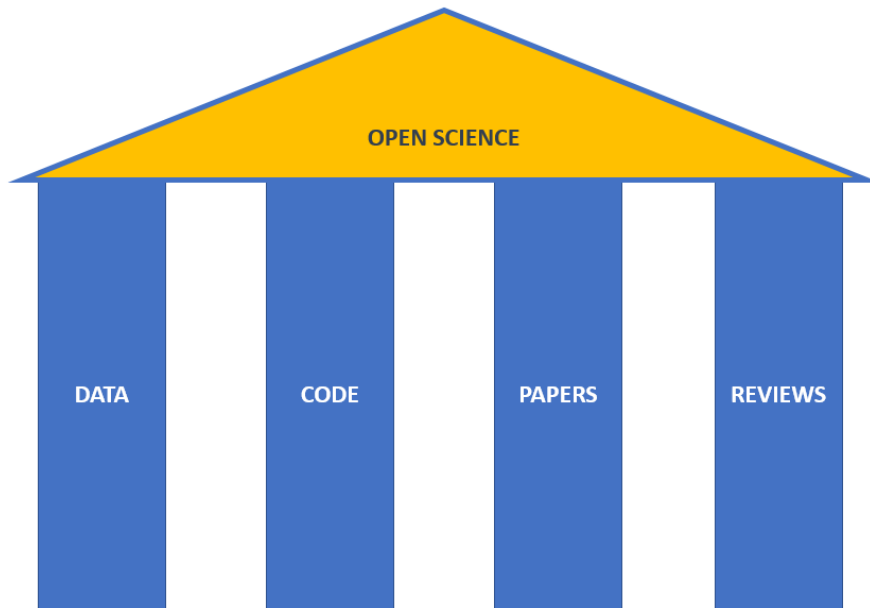

An update on Open Research activities

1. Introduction
2. Open Science in Europe and ROW
3. Impact on research
4. Overview of industry debates
5. What does this mean for T&F journals?

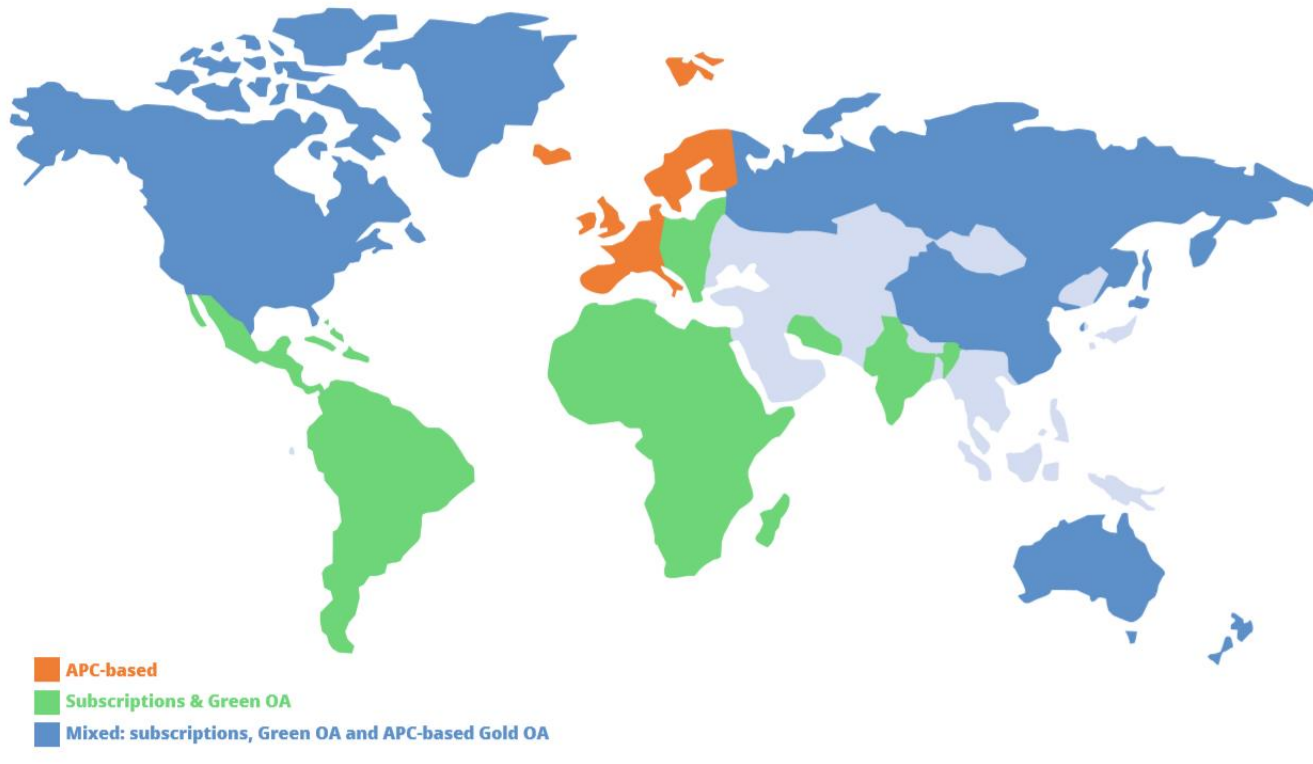

1. Introduction

Defining Open Research

Global picture – access models

2. Open Research in Europe

Driving forward data sharing

- STM Association year of data sharing
- 'Share, Link, Cite'

Environmental Sciences FAIR data pilot

Introducing the European Open Science Cloud

Providing infrastructure for data sharing

- Aim of storing and sharing data
- Prototype due in 2020
- Still many questions

Ursula von der Leyen @vonderleyen, talks about #EOSC at the Davos World Economic Forum: "We are creating a European Open Science Cloud now! It is a trusted space for researchers to store their data & access data from other researchers. We are the first in the world to do that."

Other Open Research projects

- Defining Open Peer Review
- Increasing Registered Reports and negative results
- Tension between country/regional views verses subject priorities
- Growing interest in China and Korea

3. Impact on research

Top level

- Discussion of rewards and incentives

Day to day

- Lots of requirements for authors – adding metadata
- Coming from journals, institutions and funders

4. Industry debates and discussion

- A lot of focus on access models – Plan S, transformative deals
 - Including green open access and embargos
- Role of the library in supporting researchers
- Focus on Open Science

5. What does this mean for journals?

- Data sharing policies
- Registered Reports and Open Science Badges
- Updating our guidance for open research
- Looking to make progress easier for authors

In summary

- Open Science initiatives are increasing across Europe
- Variations based on subject and geography
- Growing interest in Asia
- Majority of discussion and debate on Plan S and access to full-text.
- Sharing data is a focus for 2020

Questions?
